

Announcement of the Documentary "2050"

share

We are proud to announce the documentary “2050”, a compelling exploration of climate change and humanity’s role in shaping the planet’s future. Featuring insights from explorer Alain Hubert and filmmaker Eric Goens, the film emphasizes the urgent need for immediate action while offering a hopeful perspective.

the 1990s, the number of people in the world who are under 15 years of age is expected to increase from 1.1 billion to 1.5 billion.

As the world's population grows, the demand for food and other resources will increase. The world's population is expected to reach 6 billion by the year 2000, and to reach 8 billion by the year 2025. The world's population is expected to reach 10 billion by the year 2050. The world's population is expected to reach 12 billion by the year 2100.

The world's population is expected to reach 14 billion by the year 2150. The world's population is expected to reach 16 billion by the year 2200. The world's population is expected to reach 18 billion by the year 2250. The world's population is expected to reach 20 billion by the year 2300.

The world's population is expected to reach 22 billion by the year 2350. The world's population is expected to reach 24 billion by the year 2400. The world's population is expected to reach 26 billion by the year 2450. The world's population is expected to reach 28 billion by the year 2500.

The world's population is expected to reach 30 billion by the year 2550. The world's population is expected to reach 32 billion by the year 2600. The world's population is expected to reach 34 billion by the year 2650. The world's population is expected to reach 36 billion by the year 2700.

The world's population is expected to reach 38 billion by the year 2750. The world's population is expected to reach 40 billion by the year 2800. The world's population is expected to reach 42 billion by the year 2850. The world's population is expected to reach 44 billion by the year 2900.

The world's population is expected to reach 46 billion by the year 2950. The world's population is expected to reach 48 billion by the year 3000. The world's population is expected to reach 50 billion by the year 3050. The world's population is expected to reach 52 billion by the year 3100.

The world's population is expected to reach 54 billion by the year 3150. The world's population is expected to reach 56 billion by the year 3200.

The world's population is expected to reach 58 billion by the year 3250. The world's population is expected to reach 60 billion by the year 3300. The world's population is expected to reach 62 billion by the year 3350. The world's population is expected to reach 64 billion by the year 3400.

The world's population is expected to reach 66 billion by the year 3450. The world's population is expected to reach 68 billion by the year 3500. The world's population is expected to reach 70 billion by the year 3550. The world's population is expected to reach 72 billion by the year 3600.

The world's population is expected to reach 74 billion by the year 3650. The world's population is expected to reach 76 billion by the year 3700. The world's population is expected to reach 78 billion by the year 3750. The world's population is expected to reach 80 billion by the year 3800.

The world's population is expected to reach 82 billion by the year 3850. The world's population is expected to reach 84 billion by the year 3900. The world's population is expected to reach 86 billion by the year 3950. The world's population is expected to reach 88 billion by the year 4000.

The world's population is expected to reach 90 billion by the year 4050. The world's population is expected to reach 92 billion by the year 4100. The world's population is expected to reach 94 billion by the year 4150. The world's population is expected to reach 96 billion by the year 4200.

The world's population is expected to reach 98 billion by the year 4250. The world's population is expected to reach 100 billion by the year 4300. The world's population is expected to reach 102 billion by the year 4350. The world's population is expected to reach 104 billion by the year 4400.

The world's population is expected to reach 106 billion by the year 4450. The world's population is expected to reach 108 billion by the year 4500.

We are proud to announce the documentary “2050”, a compelling exploration of climate change and humanity’s role in shaping the planet’s future. Featuring insights from explorer Alain Hubert and filmmaker Eric Goens, the film emphasizes the urgent need for immediate action while offering a hopeful perspective.

“2050” examines the accelerating impacts of climate change, with a particular focus on Antarctica. Alain Hubert highlights the importance of addressing both atmospheric and ocean warming, underscoring the urgency of scientific research and political action. The film delivers a positive yet urgent message: we are the first generation to fully understand both the problem and the solutions, and we have the power to make a difference.
